

? 1975?

NOTES FROM YOUR PRESIDENT

To: Members of Beverley Lake Protective Association

Your Executive Council met at our cottage on August 31, 1974, and the following may be of special interest to you.

"Water Safety" will be the topic for the 1975 meeting, which will be held the first Saturday after Delta Fair. You will receive a definite notification. An Executive meeting will be held the first Friday in July 1975 at Mrs. Shelley's cottage. We thank her for the kind invitation.

In 1974 there were 3000 large mouth bass fingerlings, and 2000 small mouth bass fingerlings, placed in the lake. "Good luck, fishermen!" It should be great sport next summer.

I have been informed that the Creel Census taken in 1973 showed that Lower Beverley Lake produced more bass per hour than any lake in Leeds County. Another good omen for fishermen.

I thank Dr. Wilson and Mr. L. Irwin for attending to the restocking for the coming year - and for all the other assistance they have freely given me during a very trying period.

The majority of our members are happy and well, but some have sad hearts. On behalf of this organization, I express our sympathy to Eric Kokko for the sad loss of his young wife, who was the only daughter of Carrie and Earl Armitage. Many of you knew Susan. She attended the picnic last summer. This announcement is a very poignant one for me to face, as Susan was my much loved niece. She was 23 years old and a graduate of Carleton University, Ottawa, in Science. To any other members who have suffered sadness, I extend our sincere sympathy.

Life must continue, and to each of you I send my best wishes. We hope to meet you all in August.

It is winter today at Beverley Lake. The beauty is calm and serene.

A blanket of snow is over the lake; the scenery is gorgeous and sparklingly clean.

We hope this year brings you happiness; may your troubles be very few.

We wish you the best that life can bring; may the months be kind and gentle with you.

Sincerely,
